FitNESS platform je rezultat FitNESS projekta s ciljem postavljanja suradničke platforme za e-učenje svih zainteresiranih za sve aspekte pakiranja hrane: od funkcije ambalažnih materijala, sustava i procesa, zakonodavstva do najnovijih primjena i dizajna. Projektom su razvijeni sveobuhvatni i interaktivni sadržaji (online-radionice, webinar, kvizovi, studije slučaja...) kako bi se proširile informacije zainteresiranoj publici.

FitNESS platform is the result of the *FitNESS* project aimed at developing a collaborative e-learning platform for the community interested in all aspects of food packaging: from functions, materials, systems and processes, regulations to advanced applications and designs. Comprehensive and highly interactive contents (online-courses, webinars, quizzes, case-studies ...) are developed to disseminate information to both technical and non-technical audiences.
